

Stainless Steel Tying/Lacing Wire

Product Description/ Specification

We supply wire in coil form to be used in different areas of jacketing systems, manufactured from stainless steel 304 and 316 to following specifications:

Austenitic Stainless Steel ASTM A240/ ASTM A167/ EN 10088-2

Dimensions:

Coils are supplied in either coils of around 20-25 kg catch weight coils or in light weight coils of 1 kg.

Standard wire sizes:

0.7mm,0.8mm,0.9mm,1.0mm,1.2mm,1.6mm

Other wire dia and coil sizes can be produced to order.

Safety:

There are no known health risks in handling stainless steel, although it is recommended that gloves should be worn in case of sharp edges. Good lifting practice techniques should always be followed when handling these products.

Packaging:

Coils are individually wrapped for protection in either individually wrapped coils around 20 – 25 kg or in the case of small coils these are either in single coils or with 5 coils wrapped together.
